

MIXING/DILUTION DIRECTIONS

- 1) SHAKE container WELL prior to dilution process.
- 2) Prepare spray tank with required amount of water.
- 3) Blend in GrowSafe® using the desired quantity (see mixing ratios below).
- 4) Mix solution well, until you achieve a homogenous aqueous solution.

Do not add other products to the finished formulation, UNLESS recommended by the manufacturer.

INFESTATION PROTOCOL	RECOMMENDED GrowSafe® (%)	ADD THIS TO MAKE 1 GAL. (RTU)
Preventative	1.5%	60ml / 2 oz
Moderate	2.0%-2.5%	75-95ml / 2.5- 3.2 oz
Severe	3%	115ml / 3.9 oz
For Aphids	3%-4%	115-150ml / 3.9 - 5 oz

SPRAYING

- 1) Use a high-quality sprayer to achieve a uniform, fine mist. No need to remix diluted formula since it will remain homogenous and stable and will not separate.
- 2) Be sure spraying provides complete coverage of the plant's leaves and stems, esp. the underside of the leaves.
- 3) **Preventative protocol:** Spray every 6-10 days from clone to harvest.
- 4) **Moderate protocol:** Two (2) spraying applications per week, with a 3 day gap in between each spraying for the first two weeks. Then reduce to preventative protocol.
- 5) **Severe protocol:** Three (3) spraying applications with a 3 day gap between each spraying. Then reduce to preventative protocol.
